

CNC Machinist – Turning & Milling

Location: Lowestoft, Suffolk

Salary: Negotiable depending on experience

This position would suit candidates of all levels, experienced through to college graduates or newly qualified machinists.

Immediate Start Available

An innovative engineering company based in Lowestoft, Suffolk, specialising in the design and manufacture of specialist inspection (NDT) equipment, is looking to recruit a CNC Machinist to join our busy and growing workshop team.

This position would suit someone who has recently completed a machining or engineering qualification at college, or an individual with some workshop experience looking to further develop their skills within a professional engineering environment.

The successful candidate will work alongside experienced machinists and support the day-to-day running of the machine shop while continuing to develop their machining knowledge and practical experience.

Key Responsibilities

- Assist with the manufacture of precision components using CNC and manual machining techniques.
- Support the setting and operation of CNC milling and turning machinery.
- Read and work from engineering drawings and job specifications.
- Assist with machine set-ups, tooling changes and production runs.
- Carry out deburring, finishing, assembly and basic quality inspection duties.
- Maintain high standards of quality and housekeeping within the workshop.
- Work in accordance with ISO 9001 quality procedures.
- Follow all company health & safety policies and procedures.
- Support other departments as required.

Skills & Experience Required

- Engineering or machining qualification preferred, although practical workshop experience will also be considered.
- Basic knowledge of CNC machining, milling and turning processes.
- Ability to read and interpret engineering drawings would be advantageous.
- Keen interest in CNC programming and machine setting.
- Experience or knowledge of EDM wire erosion and spark erosion processes would be an advantage.
- Good organisational and communication skills.
- Positive attitude with a willingness to learn and develop.
- Ability to work both independently and as part of a team.
- A full clean driving licence would be advantageous.

Hours of Work

This role operates on a rotating early and late shift pattern, for example:

- 6:00am – 2:00pm
- 2:00pm – 10:00pm

What We're Looking For

We are looking for a reliable and motivated individual with a keen interest in engineering and machining. This is an excellent opportunity for someone looking to build a long-term career within a forward-thinking engineering company.
